

# Khoi Mai

Santa Ana, CA | [github.com/khoimai05](https://github.com/khoimai05) | [khoixmai.com](mailto:khoixmai.com) | [maixuankhoi05@gmail.com](mailto:maixuankhoi05@gmail.com)

## Education

---

### Purdue University

May 2028

B.S in Computer Science and Data Science, M.S in Data Science

GPA: 3.63

## Technical Skills

---

**Libraries:** Scikit-learn, TensorFlow, PyTorch, Pyspark, Pandas, Numpy, Seaborn, Matplotlib.

**Technologies:** Git, Docker, AWS, Airflow, SQL, Power BI

## Experience

---

### Discovery Park

West Lafayette, IN

Data Science Researcher

Dec 2025 - Now

- Used Python and SQL to clean, join, and engineer features from **200K+** EV charger permits (Shovels) and **1M+** POI visit records (Dewey).
- Built and validated regression models on spatially aggregated data from **150+** neighborhoods to assess how EV charger density influences travel patterns.

### Antsomi CDP

Ho Chi Minh City, Vietnam

Data Scientist Intern

Jun 2025 - Aug 2025

- Built a recommendation system for Mega Wholesale, serving **10K+** users with personalized suggestions and cross-selling insights, analyzing **\$1.2M** in annual revenue.
- Applied BERT embeddings and k-means clustering to categorize product groups, and performed association rule mining with Apriori across **30K+** transactions.
- Improved customer acquisition model processing **3M+** monthly interactions from S3 by engineering engagement interval and usage recency features.
- Achieved **89% accuracy** and **77% recall**, identifying **25K+** high-value prospects monthly from **300K+** users for Golden Gate Restaurant Group.

### VRAI Lab

West Lafayette, IN

NLP Research Assistant

Sep 2024 - Now

- Engineered automated Python scripts ingesting **10,000+** scientific papers (20GB+ per run) from PubMed, processing **450+ papers/hour** with **86%** extraction success rate.
- Delivered text analysis service to Purdue faculty by applying LDA topic modeling and hypothesis testing.

### Orient Commercial Joint Stock Bank

Ho Chi Minh City, Vietnam

Analytics Engineer Intern

May 2024 - Aug 2024

- Cleaned, transformed, and normalized **35,000+** records across multiple data sources; reduced processing time significantly to 3 hours.
- Optimized database architecture to 3NF through Python scripts, automating schema normalization, achieving **30%** faster SQL query execution.
- Developed Power BI dashboards, visualizing **5+** market KPIs across **30+** provinces and cities to support market analysis.

## Awards and Projects

---

### Microsoft GenAI Hackathon Vietnam

Runner Up

June 2024

- Won **2nd** place out of 10 participating leading financial services companies.
- Led a team of **4** to create a virtual assistant to promote and market **12** credit card products.

### Elite Edge

Basketball Analytics Platform

Dec 2025 - Now

- Constructed ML models (KNN, XGBoost) analyzing 12 years of data with **30+** features to predict tournament team selection and Final Four advancement.
